F. Management's perception of risk factors:

Both the classes of Deposits (Fixed/Cumulative) being Unsecured in nature but the Company has proven track record in servicing the Depositors till date, without any defaults either in repayment of deposit or payment of interest.

Pursuant to applicable provisions of the Companies Act, 2013 and rules made there under, as amended the Company undertakes to depositing, on or before the thirtieth day of April each year, such sum which shall not be less than twenty percent of the amount of the deposits maturing during the following financial year in deposit repayment reserve account maintained with a Scheduled Bank.

According to CRISIL rating rationale, our Financial risk profile is backed by steady cash accrual, healthy capital structure and comfortable debt protection metrics.

Risks: Risk Performance of the Engineering and Hotel Businesses:

The engineering and capital goods industry is highly vulnerable to economic cycles owing to linkages to the capital expenditure(capex) plans of customers , which are affected by slowdown in industrial growth. Despite healthy order book profitability of the engineering division may remain subdued because of intense competition.

The Company also has operations under the hospitality segment since April 2016 (via a four star hotel - Mercure in Hyderabad). The occupancy rate of the hotel improved during first nine months of fiscal 2023 along with increase in average room rate as it recovered from Covid-19 pandemic led disruptions. However, this segment remains inherently weaker than sugar & cement.

Although, performance in both the aforementioned segments is expected to improve in fiscal 2024, but overall impact on the financial risk profile is expected to be minimal, as contribution from these segments is low in terms of revenue and profitability.

Susceptibility to business cycles and continuing demand supply mismatch in South Indian cement markets.

Capacity addition to the cement industry tends to be sporadic because of the long gestation period for setting up a facility and numerous players adding capacity during the peak of the cycle. This has led to unfavourable price cycles for the sector in the past. Moreover, profitability remains exposed to volatility in input prices, including raw material power, fuel and freight. Increase in coal and pet coke prices in the second half of the fiscal 2022 and during fiscal 2023 impacted the profitability of all cement players. Realisations and profitability are also affected by demand, supply , offtake and regional factors.

CRISIL Rating: A+/ Negative

The rating agency CRISIL Ratings Ltd. has revised the ratings of Fixed Deposits of the Company to A+/Negative w.e.f.25/04/2023 from A+/Stable.
